Controversy in the Study of History

In this class we will discuss some topics and ideas about which you disagree, no matter what your religion or background may be. When that happens, try to remember that while you do have to *learn* this information, you do not have to take it to heart, nor do you have to *believe* the information. Topics like race and religion are integral to History, but we must all try to be sensitive to the individual views of others. This does not mean we cannot discuss these issues, but it does mean that we will always try to approach these issues with respect. You will probably encounter beliefs and ideas that seem strange to you, and my goal is to approach these ideas academically. If you are really troubled by a topic, come talk to me and we will try to figure something out. In my class I hope you will learn critical thinking. My job is **not** to teach you what to believe, but to give you the tools to find the answers for yourself. Hopefully, you will become a critical consumer of information.
